

GetContainerAvailability

GetAvailableContainers API is responsible for checking the availability of import containers to be picked up from the terminal. This API checks for any Road Impediments that may prevent the container from out-gating, and returns them to the user along with relevant details about the unit.

Request Details -

Container Number (unitId)

Sample API URL -

```
curl -X GET "
```

```
https://api.america.naviscloudops.com/v3/evp/inventory/units/?operator=POHA&predicate=unitId%20%3D%20CMAUXXXXXXX&fields=extras.dwellDays,scope.facility_id,unitId,eqtypeId,isoGroup,line,category,freightKind,stopFlags,impediments,lastFreeDay,ufvPosition,timestamps.timeIn,timestamps.timeOut" \
```

```
-H "Authorization: Bearer YOUR_ACCESS_TOKEN"
```
