

Orders Service

GetBookingInquiry

GetBookingInquiry API is responsible for checking if an export booking exists. If the booking is on file in the terminal operating system, the API will return general routing details about the booking.

Request Details -

Booking Number (subType = BOOK and nbr = "")

Sample API URL -

```
curl -X GET "
```

```
https://api.america.naviscloudops.com/v3/evp/orders/bookings?operator=POHA&predicate=subTy  
pe%20%3D%20BOOK%20and%20nbr%20%3D957819809" \
```

```
-H "Authorization: Bearer YOUR_ACCESS_TOKEN"
```
